

NOCTUA NA-HC5 NOCTUA NA-HC6

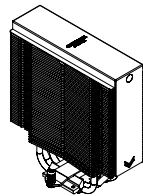

Noctua's NA-HC5 and NA-HC6 heatsink covers are add-on accessories for the award-winning NH-U14S series CPU coolers. Made from high-quality, powder-coated aluminium and available in black (chromax.black), white (chromax.white) and black with swappable inlays in black, white, red, blue, green and yellow (chromax.black.swap), they allow users to colour-customise their coolers in order to coordinate them with popular build colour schemes such as all-black, black and white or black and red.

Thanks to the easy, straightforward installation, changing the looks of a Noctua cooler only takes a few minutes and doesn't even require taking it off the CPU. Combined with the chromax.black.swap edition fans, the NA-HC covers give users endless possibilities to design their very own, individual Noctua coolers that look just as great as they cool!
