INCLUDED PARTS
NA-HCF3 fixture

NA-HCC1 steel clip

NA-HC8 cover

! **Caution**

The cover increases the height of the heatsink by 3mm (from 158mm to 161mm) and the total width by 3mm (from 125mm to 128mm). Please make sure that your case offers sufficient clearance and that the cover doesn't make contact with any other components such as PCIe cards!
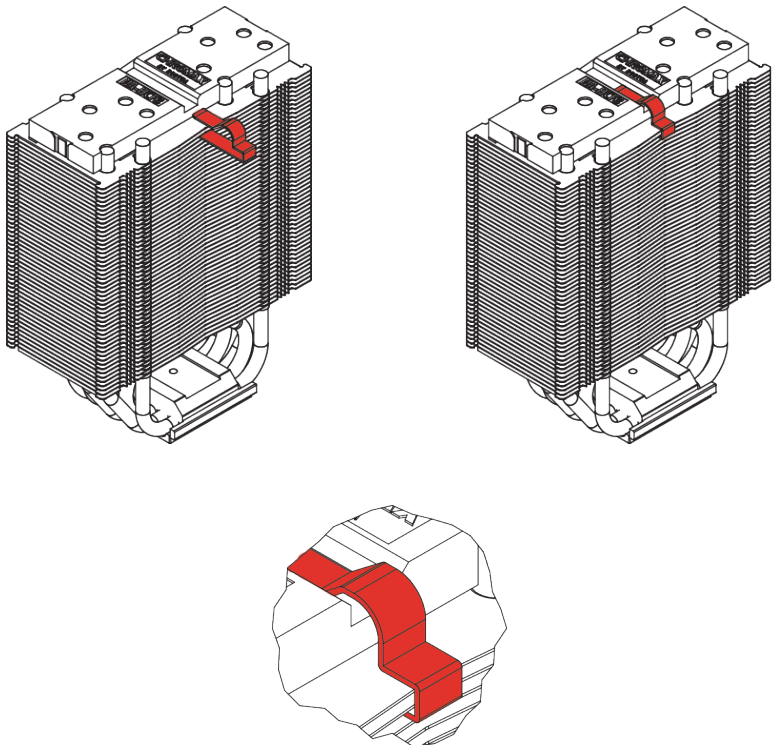

! If your CPU cooler is not yet installed, please first install the heatsink as described in the cooler manual and attach one of the two fans. If you already have both fans attached, please remove one of them.
1 Put the fixture on top of the heatsink.

2 Attach the fixture to the heatsink using the steel clip.

Note that the steel clip must go underneath the second fin from the top.

3 Slide the cover over the heatsink until the magnets snap into place.
Verify that the cover is sitting firmly on the cooler.

! **Warranty and support**

Even with high-grade products and strict quality control, the possibility of defects cannot be eliminated entirely. Therefore, we aim at providing the highest possible level of reliability and convenience by offering a warranty period of 6 years and direct, fast and straightforward RMA service.

Should you encounter any problems with your NA-HC8 chromax.white heatsink cover, please don't hesitate to contact our support team (support@noctua.at).
