

Performance X Series

120mm FDB PWM Fan XPF120X.B.PWM

The Xilence 120mm FDB Fan is ideal for gaming adventures. The elegant design of the black case fan blends elegantly into all PC builds and the embossed metallic Xilence logo also enhances the look.

Thanks to the Fluid Dynamic Bearing technology, the XPF120X.B.PWM has extremely high running accuracy and runs particularly smoothly, so that only a barely perceptible whisper of the cooling air flow is perceived. The vibration is optimally dampened by the integrated rubber pads of the case fan. The streamlined design on the rotor blades allows the air to circulate even better.

The fan can be mounted in the case as well as on a radiator or a CPU cooler.

So the gaming can also be enjoyed in silence.

Product Features

- Noble black design
- Optimum work performance in every situation
- With Fluid Dynamic Bearing (FDB) and PWM
- Quiet, cooling airflow during heated gaming sessions

Technical Data

Fan Dimensions	120x120x25mm
Connector Type	4PIN
Noise Level	22 - 24 db(A) (Typical, Average)
PWM	PWM
Bearing Type	Fluid Dynamic Bearing (FDB)
Air Flow	63.41 CFM
Fan Speed	500 - 1800 RPM
Weight	145g
Operating Time/MTBF	50000 H*

*laboratory value; strongly dependent on temperature and environmental influences

Logistical Data

Manufacturer Number	XPF120X.B.PWM
Item Number	XF082
EAN Barcode	4044953503221
